

Kris started his career in Fire investigation rather late as it became a part of his job as service engineer at the headquarters of Daikin Europe in Ostend (Belgium). What started with a few cases a year in 2006 has evolved to a full time job as fire investigator since 2014. Kris his job is to avoid false accusations or mis judgments of local fire investigators. To cope with this increased number of cases Kris started his education for level 5 fire investigator at UCLAN (UK) in 2017 and is now pursuing a BS in fire and explosion investigation at ECU (US) 2022 – “2025”.

Kris travels has taken him to more than 30 countries from North and South America via Europe and Africa to the Middle east and exceptionally also to Asia to investigate fires as Daikin is a world player in the production of all kinds of refrigeration and air-conditioning equipment. This makes Kris to encounter many different cultures and investigation procedures that are very challenging as well as interesting.

Kris has a bachelor’s degree in electromechanics (HOGENT) and is also member of the IAAI and NAFI and holds a CFEI certificate from NAFI.
